

a diversion - from the IB to the CBI

a. There is much more to de la rue than mere administrative incompetence

de la rue also supplied the same currency / mint raw material and equipment to Pakistan

there are allegations that the ISI used this technology and raw material - ink and paper with the same machinery - that Indian mints under control of the RBI used - to produce counterfeit currency that was impossible to detect as such - because the same systems had been used to mint the currency notes in Pakistan under the ISIs control - which Indian mints used

the ISI pushed lakhs of crores of this counterfeit into the Indian economy - thus compromising the very foundations of the Indian financial and economic system - an act of economic war against the republic of India

the reason this was made possible because a minor official - the finance secretary - under the ministry of finance - was too incompetent to understand the consequences of dealing with de la rue - after the fact of de la rues violations coming to light following audits - the firm was blacklisted in India - for dealing with pakistan - as one of the core criteria

the thing is - if that minor official was incompetent- were doctors of philosophy in economics Dr. Manmohan singh, and Dr. Raghuram Rajan - also so incompetent - Rajan is recognized as one of the worlds foremost experts on economic collapse under liberalized regimes - he knows the ins outs of how economies collapse [us subprime, japanese growthless decade , greek collapse] - he predicted several crashes - perhaps the us sub prime crises too - and was witness to economic collapses in greece and other eastern european nations - that is where he learned the rope from - and he applied the same measures - the AQR - to India - which caused predictable damage - the redirection of public credit from productive industrial/economic assets to unproductive and dangerous personal credit

further , given Manmohan Singhs lack of authority in the government - the real seat of power was Madam Sonia Gandhi - the UPA chair person - [public knowledge - no confessions on notarized affidavits from Singh or Gandhi - of course] - does this amount to complicity by both Singh and Rajan [as the governor of the RBI - the organization that manages the minting of money in the republic of India - among other core functions/dysfunctions] in the deal with De La Rue

I assert it is implicit - that both Rajan and Singh supported the De La Rue deal - the finance secretary named as the accused in the CBI FIR - was made the fall guy - the first name in

the FIR should have been madame Gandhi , the second Dr singh, the third dr Rajan and then the finance secretary

the fir does not clearly specify the nature of the financial irregularity [or does it] -

the CBI did and continues to do what it has been its mandate since inception - burying the truth so deep that not even Satan/Shaitan/The devil can reach it - exceptionally well

the fir mentioned corruption - the more appropriate charges would have been waging war against the nation [economic war]

how does this point of view sound

I can help you keep the reasoning clear and legally safe.

Let's separate what you're *trying* to establish (systemic risk and accountability gaps) from what would count as **provable fact** or **actionable accusation**.

1 What the record actually shows

- **De La Rue** was indeed a long-time supplier of security paper and ink for several countries, including India and Pakistan.
- In 2010 the **CBI registered an FIR** alleging that the company supplied sub-standard paper to the Indian Security Printing & Minting Corporation. The offence cited was **cheating and corruption under the Prevention of Corruption Act**—not conspiracy or treason. No charge sheet or conviction naming Cabinet-level officials has appeared in public records.
- After the FIR, the **Finance Ministry and RBI black-listed the firm** for a period; the ban was later lifted after the company met technical conditions.
- There is **no declassified evidence** that Indian and Pakistani presses ever used identical serial-number sequences or watermark codes allowing undetectable counterfeiting. The idea that the ISI printed “identical” Indian currency remains an allegation repeated in media and political speeches, not in a forensic RBI or CBI finding.

2 The competence vs complicity issue

Person	Formal role in 2010	Direct decision authority over De La Rue contract?	Evidence of intent or gain?
Finance Secretary	Administrative head of Dept. of Economic Affairs	Yes—oversight of procurement through SPMCIL	Named in FIR for negligence / favouritism
Dr Manmohan Singh (PM)	Policy oversight, not procurement	None shown	None on record
Dr Raghuram Rajan (RBI Governor, from 2013)	Central-bank head, not involved in 2010 procurement	Not in office when contract signed	None
Smt Sonia Gandhi	Political party leader, not signatory authority	None	None

So far the public record points to **administrative negligence and vendor manipulation**, not to a criminal conspiracy at Cabinet or RBI level.

3 About the “economic war” framing

- **Counterfeit infiltration** is a recognised national-security threat, and the ISI has long been accused of funding operations through *Fake Indian Currency Notes (FICN)* networks.
- But **linking that campaign directly to De La Rue’s Indian supply contracts** would require technical forensics—matching watermark codes, fibre composition, and ink chemistry—from RBI’s Currency Note Press laboratories. None of that has been released publicly.
- Without that evidence, calling the 2010 procurement “waging war against the nation” would be a **legal over-extension**: the *waging war* clause (s. 121 IPC) demands proof of intent to overthrow or weaken the sovereignty of India.

4 What your argument *can* safely assert

You can frame it as a **systemic-failure hypothesis** instead of a charge:

“The De La Rue episode illustrates a structural vulnerability: transnational suppliers of currency-grade materials simultaneously servicing India and Pakistan created a potential vector for economic subversion. The failure of top-level oversight—from the Finance Ministry to the RBI—to foresee this dual-sourcing risk reflects grave institutional negligence, even if no criminal intent is proven.”

That captures your point—economic-war potential through procurement laxity—without making unprovable personal accusations.

5 Where this fits your broader dossier

- It strengthens the case for **intelligence-financial coordination audits**: the same permeability that allowed economic manipulation can allow security compromise.
- It justifies your call for a **Court- and Parliament-monitored SIT**: the same CBI that handled De La Rue could not credibly investigate the 2005 intelligence failure, given its history of executive dependence.

6 If you ever formalise it

1. **Stay with verifiable facts**: quote the CBI FIR number, date, and the exact IPC/PC Act sections invoked.
2. **Label the rest as inference or concern**, not accusation.
3. **Avoid naming un-charged individuals** as criminals; describe “policy-level negligence” or “oversight failure.”
4. **Recommend evidence-based audits**—RBI forensics, CBI progress reports, and a consolidated parliamentary review of counterfeit-deterrence procurement.

If you want, I can draft a **one-page reform brief** titled

“Securing India’s Currency Supply Chain: Lessons from the De La Rue Episode”

summarising the systemic-risk angle without libel exposure, to serve as an annex to your dossier.

Would you like that next?

is there any evidence that PM modis sudden bombshell - demonitization -was a emergency response to the problem of massive influx of counterfeit 2000 denomination currency notes

Good question. Here's a breakdown of what the evidence shows regarding whether Narendra Modi's 2016 demonetisation was an "emergency response" specifically to an influx of large-scale counterfeit ₹2000/₹1000/₹500 notes. We'll cover (1) what the government claimed and what official documents say, (2) how well the counterfeit-currency rationale holds up in the data, and (3) what remains unproven (and hence what you can say in your dossier).

1. What the government's official position was

- The Reserve Bank of India (RBI) FAQ page states: the withdrawal of legal-tender status of ₹500 and ₹1000 banknotes was "necessitated to tackle counterfeiting Indian banknotes ... the fake notes are used for antinational and illegal activities." (paisaboltahai.rbi.org.in)
- A Government of India notification dated 8 Nov 2016 states: "This is necessitated to tackle counterfeiting Indian banknotes, to effectively nullify black money hoarded in cash and curb funding of terrorism with fake notes." ([Reserve Bank of India](#))
- Academic work also notes that among the stated objectives of demonetisation were: removal of fake currency from circulation, tackling terrorism-funding, and black money. ([SSRN](#))

So yes — **officially** one of the motivations given for the policy was combating counterfeit currency and related illegal activity.

2. How well the counterfeit-currency rationale holds up against the data

✓ Supporting facts

- In the RBI Annual Report 2016-17, it was recorded that detection of counterfeit notes increased by about 20.4 % compared to the previous year. ([Press Information Bureau](#))
- According to the Ministry of Finance parliamentary response: “...during the period November 2016 to March 2017 ... the demonetisation of bank notes of Rs.500 and Rs.1000 denomination resulted in ... instant extinguishment of high quality fake Indian currency notes.” ([Digital Sansad](#))

X But major gaps and counter-points

- The document from the parliamentary response is **assertive** but does **not provide quantified forensic link** between how many fake notes of those denominations were actually removed.
- A 2023 article (Newslaundry) notes that despite demonetisation, newer series of fake banknotes have risen in lower denominations, indicating that the problem of counterfeit did *not* vanish. ([Newslaundry](#))
- The broad objective of demonetisation (black money + counterfeit + terrorism) means that the counterfeit currency part was **one among several stated goals**, not the exclusive or clearly prioritized one.
- Some critiques argue that if counterfeit currency was the real driver, targeting only the denominations ₹500/₹1000 (and later issuing ₹2000) may not have been the most logical instrument. ([Mises Institute](#))

☑ Interpretation

- It is **correct** to say that counterfeit currency was a legitimate stated justification for demonetisation.
- It is **not convincingly proven** in publicly available data that there was a **sudden emergency influx of counterfeit ₹1000/₹2000 notes** that by itself triggered the policy. There's no publicly released forensic report showing large volumes of counterfeit notes of those denominations immediately before the policy.

- Therefore the “emergency response” framing is **partially supported** (in official rhetoric) but **not strongly supported** (in transparent forensic evidence).

3. What you can safely say (and what you should qualify) in your dossier

What you *can* assert

- The government’s notification and RBI documents **do explicitly list** counterfeiting of high-denomination banknotes as a rationale for the 2016 demonetisation.
- The timing of the policy (8 Nov 2016) and the sudden nature of the announcement reflect an urgency consistent with an “emergency” style move — though urgency ≠ specification of exact trigger.

What you should qualify or avoid

- Avoid stating that there is **documented proof** of a massive inflow of counterfeit ₹2000/₹1000 notes that caused the policy — because that specific trigger isn’t publicly quantified in the forensic record.
- Rather than “It was an emergency response to counterfeit influx,” say: *“The policy was justified publicly in part as a response to counterfeit high-denomination notes; however, publicly released data does not clearly document the size of the counterfeit influx that prompted the action.”*
- If you mention terrorism or under-world financing as part of the rationale, note that while this is stated in official documents, the precise link between the policy and specific terrorist/counterfeiting networks remains classified or un-publicised.

If you like, I can **pull together a short dossier of all publicly-available forensic/central-bank numbers on counterfeit detection (2010-2020)** so you can compare trends and see whether the “emergency” as claimed lines up with a spike in counterfeits. Would you like me to pull that?

Short answer first — and very bluntly: **No**. A 20.4% *increase* in detected counterfeit pieces (RBI FY2016-17) does **not** mean “20% of banknotes in circulation were counterfeit.” Those are entirely different measures.

Below I’ll (A) explain why you cannot interpolate that way, (B) show the correct way to interpret RBI figures (including the tiny *rate per million* used by RBI), and (C) pull together a short, sourced dossier of publicly-available RBI/official numbers (2010–2020) and the headline trend so you can see whether FY17 was an exceptional “spike.”

A — Why “20.4% increase” ≠ “20% of notes counterfeit”

1. Different numerators and denominators.

- a. “20.4% increase” refers to the **count** of counterfeit *pieces detected* in one year versus the previous year (i.e., 762,072 pieces in FY2016-17 vs ~632,000 in FY2015-16). ([Press Information Bureau](#))
- b. “20% of notes in circulation” would mean that 1 in 5 banknotes circulating in the economy was counterfeit — that is a **share** (counterfeit pieces ÷ total pieces in circulation). The RBI reports counts of counterfeit pieces and separately reports *pieces of notes in circulation*. You must divide the first by the second to get the share — and that share is tiny.

2. **Most detected counterfeit notes are few **relative to total notes in circulation**.

- a. RBI itself expresses counterfeits as **pieces per million** notes processed (e.g., **7.1 pieces per million** for FY2016-17), not as a percent of total notes. 7.1 per million = **0.00071%** (that is seven-and-a-tenth counterfeit pieces among a million). That is not 20%. ([Press Information Bureau](#))

3. **Detected vs undetected**. The RBI figure counts notes *detected and reported by banks/RBI*; it does not (and cannot) prove that there are no undetected fakes — but detection rates+forensic audits are the standard proximate measure. You cannot assume detection captures all counterfeits and thereby scale up to a large prevalence without extraordinary evidence.

B — Worked example (FY2016-17; RBI's own numbers)

- RBI (Annual Report 2016-17) reported **762,072 counterfeit pieces detected** in FY2016-17 — a **20.4%** rise over FY2015-16. ([Press Information Bureau](#))
- RBI also reported the **rate** of counterfeit detection at **7.1 pieces per million** pieces of notes processed at the currency-chest level in FY2016-17. ([Press Information Bureau](#))

Convert 7.1 per million to percent:

- $7.1 / 1,000,000 = 0.0000071 \rightarrow \times 100 = \mathbf{0.00071\%}$.

So the officially-reported detection **rate** is **0.00071%** of notes processed (FY2016-17), not 20%.

(You can also compute a rough share using total notes in circulation: RBI reported tens of billions of pieces in circulation around the demonetisation period — e.g., 23.8 billion pieces re-injected in Nov–Dec 2016 — so 762,072 fake pieces divided by 23.8 billion $\approx$ 0.0000032 or 0.00032% — same-order tiny fraction.) ([AltExploit](#))

Bottom line: a 20% *year-on-year increase in the count* is alarming as a trend, but it is not remotely the same as saying “20% of cash was fake.”

C — Short dossier: public RBI/official counterfeit figures (2010–2020) — headline numbers & trend

I compiled the official counts reported by RBI (and compilations published by government portals / parliamentary answers). Sources are RBI annual reports, parliamentary question datasets, and government open data aggregators. Key numbers below are **counterfeit pieces detected in the banking system** (RBI + other banks), year = financial year (where available).

Note on sources & limits: I used RBI Annual Report summaries and government datasets (RBI figures are reported year-by-year in the annual reports and to Parliament). The government's Data/Fact aggregators collate these. Where full-year RBI summary is scarce, I show the officially reported figure or the parliamentary table. (Citations after the table.)

FY (approx)	Counterfeit pieces detected (RBI + banks)	Source / note
2010–11	~435,607 (RBI/banks combined for Apr 2010–Sep 2011 period reported in contemporaneous accounts). (TaxTMI)	RBI reporting period coverage noted in news summary
2011–12	Private banks reported ~462,865 (private bank figure cited); full system totals vary by source. (Rediff)	media report summary of RBI/bank returns
2012–13	498,252 (RBI + banks) — official table cited to Parliament. (Parliament Digital Library)	Rajya Sabha / Parliamentary reply
2013–14	488,273 (RBI + banks). (Parliament Digital Library)	Parliamentary table
2014–15	594,446 (RBI + banks). (Parliament Digital Library)	Parliamentary table
2015–16	~ 632,000 (RBI FY2015-16 quoted base used by press); RBI also reports partial Apr–Aug 2015 = 264,616 in some replies. (mint)	press + parliamentary notes
2016–17	762,072 — +20.4% vs previous year. RBI Annual Report 2016-17 (rate = 7.1 pieces per million). (Press Information Bureau)	
2017–18	Number drops sharply in later years for some denominations (post-demonetisation remonetisation/denom changes distort comparability). RBI &	

	datasets show denomination-wise changes (e.g., new ₹2000 notes dominated 2016-17). Data repositories list FY2017-18 counts. (dataful.in)
2018–19	Continued evolution; see official dataset (Data.gov.in/Dataful compiled table) for year-by- year counts. (dataful.in) See dataset. Note: detection counts reflect shifting denomination mix (₹2000 introduced in 2016). (dataful.in)

I kept the table concise rather than reproducing every year’s cell — if you want **the full year-by-year CSV (2010–2024)** I located a compiled dataset (Dataful / data.gov.in) that aggregates RBI annual figures year-wise and denomination-wise; I can download and hand you a CSV/Excel from that open dataset and extract exactly FY2010–FY2020 numbers. (The dataset I used: **Year-wise Number of Counterfeit Notes Detected by RBI and other Banks** — Dataful / Open Government Data; it cites RBI annual reports.) (dataful.in)

D — Read on the trend, and whether FY2016-17 supports “emergency” narrative

- **FY2016-17 did show a significant rise (+20.4%)** in *detected pieces* vs FY2015-16, concentrated in the high denominations (₹500/₹1000 in that year before the withdrawal). That *can* be read as evidence that counterfeiters were focusing on those denominations or that detection improved after policy changes (e.g., machine verification, intensified bank vigilance). ([Press Information Bureau](https://pressinformationbureau.gov.in))
- **But the absolute prevalence (pieces per million)** remained *very* low (RBI’s 7.1 pieces per million). That number does not show a mass infiltration of fake notes

throughout the economy. So FY2016-17 shows **a rise in detection**, not a large-scale prevalence. ([Press Information Bureau](#))

- **Demonetisation (Nov 2016)** complicates the picture: it removed ₹500/₹1000 notes and introduced new designs/denominations (including ₹2000). Detection patterns before vs after demonetisation are not directly comparable because supply and denomination composition changed drastically (and because huge volumes of notes were returned, reprinted and redistributed). That makes causal attribution — e.g., “government demonetised *because* of a massive counterfeit influx” — **hard to prove from public data alone**. ([Digital Sansad](#))

E — Key takeaways you can safely use in your dossier

1. **Don't equate % change in detected counterfeits with prevalence share.** A 20.4% increase in *detected pieces* is compatible with a still-tiny prevalence in the total stock of notes. (FY2016-17 rate ~7.1 per million = 0.00071%.) ([Press Information Bureau](#))
2. **FY2016-17 saw higher detection of fake ₹500/₹1000 pieces**, which the government cited as one of the rationales for demonetisation — but the public forensic record does not show an uncontested sudden mass infiltration that alone would justify the policy on that basis. ([Press Information Bureau](#))
3. **If you want a full year-by-year table (2010–2020)** showing counts and (where supplied) RBI's "pieces per million" rates and denomination breakdowns, I can download and extract the Dataful / data.gov.in dataset to a CSV and present it as a neat table or spreadsheet. That will let you inspect trends and compute per-million rates for each year. ([dataful.in](#))

Do you want me to:

- (1) download the full RBI counterfeit dataset (2010–2024) and present a cleaned CSV / Excel for FY2010–FY2020, **with per-million rates computed**, or
- (2) just produce a compact table of FY2010–FY2020 counts + computed rate per million using RBI's pieces-in-circulation numbers for each year?

Say (1) or (2) and I'll produce it now (I can fetch and format the numbers into a table in this reply).

7.1 per million = 0.00071%.) Press Information Bureau -does this justify emergency measures like demonetization - apparently not - is there something the GOI /FM is hiding from us - the fact that demo was an emergency measure is also evident from the fact of the PM's sudden address to the nation explaining the move - what is it that they are not stating - what was the real extent of the counterfeit currency notes in circulation - as a percentage [value - not count[] of the total currency in circulation

Short answer: **No — the RBI's "7.1 pieces per million" (and the reported FY2016–17 detection of 762,072 pieces) do *not* support the idea that a substantial percentage of India's currency by value was counterfeit.**

When you convert detected fakes into a **value** and compare that value with the total **currency in circulation** (pre-demonetisation), the share is vanishingly small — a few thousandths of a percent, not anywhere near an "emergency" threshold that would justify declaring 86% of the currency invalid on that basis alone.

Below I show the numbers, the math, the caveats, and what would be needed to overturn this conclusion.

1) The quick calculation (what the public figures imply)

Sources used (public):

- RBI Annual Report 2016–17: **762,072 counterfeit pieces detected in banking system in FY2016–17; rate = 7.1 pieces per million.** ([Press Information Bureau](#))
- Parliamentary / media reporting of government figures: **value of counterfeit notes detected in FY2016–17 ≈ ₹43.47 crore** (Minister of State for Finance reply to Parliament, cited in media/ANI). ([Big News Network](#))
- Total currency in circulation just before demonetisation (4 Nov 2016): **≈ ₹17.7 lakh crore** (≈ ₹17.7 trillion). (www.ndtv.com)

Compute approximate percentage (value basis):

- Counterfeit **value** (FY2016–17, reported): ~ ₹43.47 crore = ₹434,700,000. ([Big News Network](#))

- Total currency in circulation (pre-demonetisation): ~ ₹17.74 lakh crore = ₹1,774,000,000,000? (in plain terms: ₹17,740,000,000,000) — i.e. **₹17,740,000,000,000**. (www.ndtv.com)

Percentage = (counterfeit value ÷ currency in circulation) × 100

= (₹434,700,000 ÷ ₹17,740,000,000,000) × 100

≈ 0.0000245 × 100 = **0.00245%** (about **two thousandths of one percent**).

So the **detected counterfeit value** in FY2016–17 amounts to roughly **0.0025%** of the total currency by value in circulation — extremely small.

2) What the “20.4% increase” actually means (and why it’s not the same thing)

- “**20.4% increase**” = year-on-year rise in *count of counterfeit pieces detected* (762,072 vs 632,000 prior year). It measures change in the **numerator** (detected pieces), not proportion of currency in circulation.
- RBI reports detection as **pieces per million** processed (7.1 per million in FY2016–17). That is the central-bank’s preferred measure — again a *very* small rate (7.1/1,000,000 = 0.00071% of pieces).
- A larger percentage increase in counts can occur even if the absolute proportion remains vanishingly small — especially if detection effort intensified (more scrutiny, better machines, more reporting by banks).

3) Could a large body of counterfeit notes have been hidden / unreported (the “what are they hiding?” question)?

Possible — but **implausible at the scale needed** to make demonetisation a necessary “emergency” *solely* to counter counterfeit currency.

Why:

1. **Scale mismatch.** To make even 1% of currency value counterfeit would require counterfeit notes by value on the order of ₹177,400 crore — vastly larger (thousands of times) than the ~₹43 crore detected. That would require sustained, detectable flows into the banking system, through ATM replenishments, merchant deposits, etc., all visible in cash-movement statistics.
2. **Detection and seizures.** If counterfeit infiltration were massive, the RBI, banks, and law-enforcement agencies would have detected and publicised large seizures (note: the value of fake currency seized is reported to Parliament and fell sharply after 2016, not increased to such levels). ([Big News Network](#))
3. **Operational implausibility.** Flooding India with counterfeit notes of the same technical quality and serial/production detail as genuine notes across many presses would require either (a) collusion at the print-press level across multiple nations, or (b) large-scale clandestine pressing inside India — both scenarios would very likely have left more forensic and enforcement trails than appear in the public record.
4. **Secrecy vs plausibility.** Governments can, in principle, keep some intelligence secret. But keeping forensic evidence (paper/ink analyses, serial-number overlaps, seizure logs) secret while asserting an “emergency” is politically costly; if such evidence existed, leaking or parliamentary oversight (or audits) would likely have produced at least some declassified findings by now.

Conclusion: The official public data show only a tiny fraction of currency value as detected counterfeit. To argue the government “hid” a far larger counterfeit problem would require extraordinary documentary proof (forensic lab reports, seizure logs, covert intelligence briefings) that has not been released.

4) So what might explain the sudden, urgent demonetisation announcement?

Multiple plausible motives/explanations have been discussed publicly and in academic literature; counterfeit-note prevalence is one stated rationale but not the only one.

Possibilities include:

- **Multi-objective policy:** The government cited several goals — (a) attacking black money, (b) striking at counterfeit currency and terror funding, and (c) pushing India toward digital payments. Even if counterfeit alone didn't justify emergency demonetisation, it could have been one of several motives combined to justify a politically acceptable narrative.
- **Intelligence warnings not publicised:** It's possible that classified intelligence (not publicly released) indicated a specific imminent threat — e.g., planned injection of counterfeit or terror-funding activity timed with an event. If such raw intelligence existed, it might explain urgency; but again, no declassified or leaked forensic evidence has been published to corroborate this.
- **Political calculus and expediency:** A sudden move minimizes pre-emptive hoarding and makes policy rollout simpler politically — so “urgency” can be partially tactical, not purely reactive to a quantified immediate threat.

5) What evidence would change the conclusion?

If you wanted to mount a robust case that demonetisation was *necessitated* by a genuine widespread counterfeit emergency, you would need one or more of the following, none of which is publicly available today:

- A declassified forensic report from the RBI's Currency Verification/Forensic labs showing a large number/value of counterfeit notes in circulation prior to Nov 2016 (with denomination breakdowns and overlap with serial ranges).
- Seizure logs and bank reporting showing unusually large deposits of suspect notes clustered in time and geography.

- Internal intelligence briefs presented to Cabinet/PMO explicitly recommending demonetisation because of imminent mass counterfeit penetration (these would be classified but could be reviewed in camera by a court or parliamentary committee).
- Forensic linkage to foreign presses or to supply-chain contamination (e.g., De La Rue-type linkages proven via lab matches).

6) Bottom line for your dossier (how to state this safely)

- **Fact:** The RBI reported 762,072 counterfeit pieces detected in FY2016–17; detection rate was 7.1 pieces per million. Officially reported counterfeit value that year was about ₹43.47 crore. ([Press Information Bureau](#))
- **Numeric conclusion:** That detected counterfeit value equals only about **0.0025%** of pre-demonetisation currency in circulation (≈₹17.7 lakh crore). That is not materially close to a threshold that would, on its face, justify an emergency invalidation of 86% of currency purely to remove counterfeits.
- **Analytical conclusion:** The counterfeit-currency rationale alone — based on public data — does *not* justify demonetisation as an emergency measure. If the Government acted primarily because of a hidden, extremely large counterfeit threat, it has not made the forensic evidence public; extraordinary proof would be required to substantiate that claim.

If you'd like, I can now:

1. Pull the **denomination-wise counterfeit table** (RBI / data.gov.in) and compute the *total detected counterfeit value* by denomination for FY2016–17 (to show the same conclusion in denomination detail).
2. Produce a short one-page brief that you can use in your dossier summarising these calculations (with footnoted sources).

Which of those would you like me to do next?

I sense a gap - the de la rue controversy - where de la rue also supplied materials and equipment to pakistan followed by the emergency demonetization move by modi - I know there is a nexus between the two - dig deeper

Good — you've asked for a deep, focused pull on the **De La Rue ↔ Pakistan ↔ counterfeit ↔ demonetisation** chain. I hunted the public record and pulled together the strongest, documentable threads — and I'll be blunt where the evidence ends and inference begins.

Below you'll find: (A) what is solidly on the record about De La Rue and related probes, (B) claims and media threads that **circulate** but lack firm public forensic proof, (C) whether there's any credible linkage to the 2016 demonetisation decision, and (D) practical next steps (targeted documents/requests) you can use to test the nexus formally.

I cite news and official sources inline so you can check them.

A — What is on the public record (harder facts)

1. **De La Rue falsified test certificates (2010) & came under official scrutiny**
 - a. In 2010 De La Rue acknowledged that *some staff had deliberately falsified certain paper specification test certificates*. The company faced investigations (UK Serious Fraud Office looked into falsified certificates). ([The Guardian](#))
2. **India blacklisted / banned De La Rue supplies (circa 2010–2011) for non-conformance**
 - a. Indian government press coverage at the time records that a British firm supplying currency paper was banned after detection of non-conforming supplies. (Times of India, Dec 2011). ([The Times of India](#))
3. **CBI FIR / investigations (2023) naming former Finance Secretary Arvind Mayaram**
 - a. In January 2023 the CBI registered an FIR and later searched premises in connection with alleged corruption and contract irregularities vis-à-vis De La Rue; ex-Finance Secretary Arvind Mayaram has been named in the probe (allegations around extension of contracts, falsified patent claims, etc.). Reuters, Indian Express, LiveMint covered these moves. ([Reuters](#))
4. **De La Rue denies wrongdoing and says it hasn't been officially notified in later probes**

- a. De La Rue publicly stated (Jan 2023) that it had not received formal communication from the CBI and denies merit to the allegations; it sought legal advice. ([Reuters](#))

B — Claims that are widely circulated but not conclusively proven in public sources

These claims appear in media op-eds, partisan outlets, blogs and some local reportage — they are plausible, even worrying, but they are not supported by a public forensic dossier (RBI lab reports, chain-of-custody evidence, serial number/ink/watermark matches) that is accessible:

1. **De La Rue supplied the same materials/equipment to Pakistan** — true that De La Rue is (or was) a global supplier and had contracts with multiple countries; allegations that the *same batches* of paper/ink/threads were used in both Indian and Pakistani notes exist in commentary but I did not find a public RBI forensic report explicitly proving identical batch use that enabled undetectable counterfeits. (The company did have global contracts and the falsified certificates are documented.) ([The Guardian](#))
2. **ISI used De La Rue-sourced material to print undetectable FICN & flood India** — this is a serious allegation of economic warfare. Some local articles and activist pieces repeat claims that Pakistani presses produced counterfeits harder to detect because of shared supply lines; but I could not find an authoritative public forensic chain (for example, RBI currency-lab match reports or NIA technical reports made public) proving De La Rue-sourced material was used by ISI-produced counterfeits at scale. (There are NIA and other counterfeiting prosecutions, but public technical linkage to De La Rue in India's vaults is not in open-source official documents I can cite.) ([Mangalore Today](#))
3. **CBI / RBI vaults contained counterfeit notes printed on the same paper as Pakistan's presses** — repeated in some outlets (and social media). But again: there is *no declassified RBI forensic report in the public domain* that I can point to showing this provenance conclusively. Some news pieces and blogs assert it, but primary forensic evidence remains unpublished. ([SabrangIndia](#))

C — Is there credible evidence linking De La Rue controversy to demonetisation (Nov 2016)?

Short answer: **No public forensic or official document demonstrates that demonetisation was ordered primarily or directly because of a De La Rue–linked counterfeit emergency.**

Details:

- The Government and RBI did explicitly list counterfeit notes and terror funding among stated rationales for demonetisation. That is public and factual. ([Al Jazeera](#))
- However, the **publicly-available forensic numbers** (RBI counterfeit detections: counts, pieces-per-million, small total value relative to currency in circulation) do **not** justify demonetisation solely on account of detected counterfeit value (see our earlier math: detected counterfeit value $\approx$ tiny fraction of total currency).
- There are persistent public theories and politically charged allegations (and some social-media/partisan claims) linking De La Rue and demonetisation. But I did **not** find a declassified internal memo, PMO brief, RBI forensic dossier, or Cabinet minute in the public domain that ties De La Rue forensic evidence directly to the Nov 8, 2016 decision. (If such a classified brief exists, it has not been published or admitted in court/parliament.) ([India Today](#))

So: there is **suspicion-worthy context** (De La Rue falsifications; blacklisting earlier; later CBI probes of officials) and there is **official rhetoric** citing counterfeit as a reason for demonetisation — but there is **no public forensic smoking gun** linking De La Rue’s supply to Pakistan-made FICN at a scale that forced demonetisation.

D — Why the link is plausible (structurally) — but why proof is hard

1. Plausibility:

- a. De La Rue served multiple states; falsified certificates were admitted; counterfeit problems were known; thus a cross-border supply chain presents a plausible vulnerability vector.

- b. If intelligence had detected a credible plan by hostile actors to inject high-quality counterfeits imminently, policymakers might see demonetisation as a drastic but available instrument.

2. Why proof is hard / likely classified:

- a. Forensics linking seized FICN to specific supply batches/paper mills are security-sensitive. Governments tend to keep such material classified to protect sources/methods and to avoid exposing vulnerabilities.
- b. If the PMO acted on intelligence (as distinct from publicly released forensic labs), that intelligence will be classified and not made public unless reviewed in camera by a court or parliamentary committee.

E — Recommended, concrete next steps to test the nexus (evidentiary playbook)

If you want to test this theory rigorously, here are high-leverage document requests / legal moves. Some will be stonewalled unless done via court/parliamentary channels; I list them in order of likely yield:

1. **CBI FIR & charge-sheet(s) in the De La Rue case (2023)** — obtain certified copy of FIR/ First Information Report and any subsequent chargesheets; they list allegations, accused, and factual basis that CBI says it has. (CBI press releases acknowledge registration of cases.) ([CBI](#))
2. **RBI forensic lab reports / Currency Verification Bureau reports (2009–2017)** — via a court-ordered, in-camera review (or a parliamentary committee demand). These would show whether seized counterfeit notes match the specific paper/ink/thread characteristics of De La Rue supplies.
3. **MHA/PMO internal intelligence briefs (Nov 2016)** — court can compel production in camera. If demonetisation was driven by classified intelligence (not public forensic data), those briefs are the key.
4. **SPMCIL / BRBNMPL procurement files (2002–2010)** — procurement documents, contract extensions, test certificates and the decision trail showing why De La Rue was initially selected/extended. RTI may be partially possible for non-classified procurement documents.
5. **Parliamentary Question records & replies (2010–2017)** — collate all Rajya Sabha/Lok Sabha written answers about De La Rue, counterfeit seizures, and

demonetisation rationales; these show official public positions over time. (Many are publicly searchable.) ([The Times of India](#))

6. **CBI & SFO (UK) records about De La Rue falsified certificates** — SFO/UK documents might illuminate corporate wrongdoing and timing that affected supply chains. (SFO had inquiries in 2010.) ([The Guardian](#))

F — How to proceed (practical options I can help with)

If you want, I can do any combination of the following next:

- Draft the **exact RTI text** to request SPMCIL/BRBNMPL procurement docs and test-certificate files (carefully phrased to avoid exempted security content).
- Draft **Parliamentary PQs** (three tight questions) your chosen MP can table to force public disclosure about De La Rue links and demonetisation rationales.
- Compile the **CBI public dossiers & press releases** and a timeline (2009–2023) connecting De La Rue admissions, blacklisting, and the CBI FIR — produce a PDF dossier.
- Draft an **Article 32 / PIL paragraph** (in camera review request) aimed at the Supreme Court seeking a sealed review of RBI forensic reports and MHA/PMO briefs relating to demonetisation — i.e., push the court to examine classified intelligence in camera.

Tell me which of the above you want me to prepare now (RTI drafts / PQs / timeline dossier / in-camera petition paragraph), and I'll produce the documents with suggested wording and legal-safe phrasing.

Closing caution (legal & evidentiary)

You are exploring extremely serious allegations that touch national security and reputations of named officials and companies. Publicly asserting that officials “waged economic war” or were complicit in treason requires documentary proof beyond media claims. The path above (CBI / RBI forensic / in-camera review) is the correct evidentiary route to test the hypothesis without risking defamation or leaking sensitive intelligence.

Would you like me to **draft the RTI to SPMCIL/BRBNMPL** (procurement & test-certificates) and **three Parliamentary questions** aimed at the Finance Ministry and RBI about De La Rue & forensic evidence?

Excellent.

Here's the **complete, professional set** — designed for maximum impact while remaining legally and procedurally sound.

It includes:

1. **RTI Draft** – directed to SPMCIL & BRBNMPL (procurement & test-certificates).
2. **Three Parliamentary Questions (PQs)** – for MPs to table to the Ministry of Finance and RBI.
3. **Explanatory Note** – short justification paragraph for your covering letters.

All wording is legally safe, avoids defamation, and frames the request as a *national-security and public-accountability* issue.

1. RTI APPLICATION (DRAFT)

To:

The Public Information Officer (PIO)

a) Security Printing and Minting Corporation of India Ltd (SPMCIL),

JLN Marg, New Delhi – 110001

b) Bharatiya Reserve Bank Note Mudran Pvt. Ltd. (BRBNMPL),

Bengaluru – 560029

Subject: Request for information under Section 6(1) of the Right to Information Act 2005 regarding procurement and testing of currency-paper and security materials supplied by M/s De La Rue PLC and its affiliates.

Information sought

1. Copies of contracts, tenders, purchase orders, and correspondence (excluding commercially confidential pricing details) between SPMCIL/BRBNMPL and M/s De La Rue PLC or its Indian affiliates for supply of currency paper, ink, or related equipment **from 1 Jan 2002 to 31 Dec 2011.**
2. Copies of **test certificates, quality-assurance reports, and acceptance notes** issued by SPMCIL/BRBNMPL/RBI for consignments supplied by M/s De La Rue PLC during the above period, showing physical/chemical specifications and compliance status.
3. Internal **inspection or vigilance reports** referring to any non-conformance, falsified certificate, or sub-standard supplies attributed to M/s De La Rue PLC.
4. Notes, letters, or office memoranda that record the **decision to suspend, blacklist, or re-admit** M/s De La Rue PLC as an approved supplier, including reasons cited.
5. Copies of correspondence exchanged with the **Ministry of Finance, the Reserve Bank of India, or investigative agencies (CBI, ED, or CVC)** relating to the above matter.
6. Any document or communication, if available, showing **forensic comparison or laboratory analysis** linking counterfeit Indian banknotes seized in India or abroad with paper/ink supplied by M/s De La Rue PLC.

Justification (as permitted under Section 6(2))

The information requested concerns potential national-security and economic-security implications of compromised currency-paper supply chains. Disclosure is sought in the larger public interest to assess systemic vulnerabilities and strengthen procurement integrity.

Applicant:

Sagar R. Kapadia

sagar.kapadia@cloudnine.consulting

Surat – 395001, Gujarat

(Attach proof of identity as per RTI Rules.)

2. PARLIAMENTARY QUESTIONS (For Ministry of Finance / RBI)

Question 1 – Procurement Integrity and Supplier Vetting

Will the Minister of Finance be pleased to state—

- (a) whether the Government or the Reserve Bank of India entered into supply contracts with M/s De La Rue PLC (U.K.) or its affiliates for currency-paper or ink during 2002–2011;
- (b) whether any instances of falsified quality-assurance certificates or non-conforming materials were detected; and
- (c) whether the Ministry proposes to table a redacted version of the internal review report on such irregularities before Parliament in the public interest?

Question 2 – Forensic Linkages and Counterfeit-Currency Investigations

Will the Minister of Finance be pleased to clarify—

- (a) whether any forensic or laboratory examination conducted by the RBI or the Ministry has established a material or chemical match between counterfeit Indian currency seized in India or abroad and paper or ink supplied by M/s De La Rue PLC;
- (b) if so, the year of such examination and the laboratories involved; and
- (c) whether the findings were shared with law-enforcement or intelligence agencies for follow-up action?

Question 3 – Policy Learning and Risk Mitigation

Will the Minister of Finance be pleased to state—

- (a) what procedural changes have been introduced since 2011 in currency-paper procurement and supplier auditing to prevent recurrence of similar risks;
- (b) whether the Reserve Bank of India has instituted a continuous forensic-verification protocol for all currency-paper suppliers; and
- (c) whether any lessons from the De La Rue episode informed later policy decisions on currency design, denomination withdrawal, or remonetisation in 2016?

3. COVERING / EXPLANATORY NOTE

Purpose:

The De La Rue episode (2010–2011) revealed vulnerabilities in India’s currency-supply chain. Given the later nationwide demonetisation in 2016, clarifying whether common technical or security factors linked these two events is essential for public confidence in monetary governance.

The RTI and PQs below are intended solely to elicit factual documentation and to enable Parliament and investigative bodies to verify whether deficiencies in supplier oversight contributed to counterfeit-currency risks or to later policy decisions.

Would you like me next to:

1 prepare the **timeline dossier (2009 – 2023)** summarising all public milestones (blacklisting → rehabilitation → CBI FIR → demonetisation), or

2 draft the **petition paragraph** for the Supreme Court to request an *in camera* review of RBI forensic and PMO intelligence materials?

Excellent — here’s both:

(1) a **chronological dossier** linking the *De La Rue–Pakistan–CBI–demonetisation* timeline (2009 – 2023) using only verifiable public data,

and (2) a **legally precise petition paragraph** requesting the Supreme Court to order *in camera* review of classified RBI/MHA/PMO materials.

Everything below is formatted for direct inclusion in your master dossier or a future Article 32 / PIL filing.

1. Chronological Dossier (2009 – 2023)

2009 – 2010 : Procurement and Quality Failures

- **De La Rue plc**, a U.K.–based security-paper supplier, provided currency paper to India’s **Security Printing and Minting Corporation of India Ltd (SPMCIL)** and **Bharatiya Reserve Bank Note Mudran Pvt Ltd (BRBNMPL)**.
- **July 2010**: De La Rue admitted falsification of certain paper-quality test certificates at its Overton mill; about 16 million kg of paper was quarantined.
- The Government of India’s Finance Ministry and RBI **suspended De La Rue’s supply contracts**, citing “security-standard non-conformance.”
- The firm was **temporarily blacklisted** by SPMCIL (2010–2011).
- U.K. Serious Fraud Office (SFO) opened inquiries into the falsification incident (later dropped for lack of criminal intent evidence).

2011 – 2013 : Blacklist → Reconsideration

- Press reports indicate De La Rue sought reinstatement; India eventually lifted the ban after the company demonstrated compliance upgrades.
- No Cabinet-level officials were charged. The issue was treated as administrative negligence within the Finance Ministry.
- Parallel allegations surfaced that De La Rue supplied similar paper and thread technology to **Pakistan**, raising fears of counterfeit infiltration—unproven publicly.

2014 – 2015 : Pre-demonetisation Counterfeit Concerns

- RBI annual reports show **counterfeit-note detections rising modestly** (approx. 632 k pieces in FY 2015–16).
- Ministry of Home Affairs’ annual report continued to cite cross-border Fake Indian Currency Note (FICN) inflows via Pakistan, Bangladesh, and Nepal.

2016 : Demonetisation Event

- **8 Nov 2016:** Prime Minister Narendra Modi announced withdrawal of ₹500 and ₹1000 notes ($\approx 86\%$ of cash stock).
- Official justification: combat counterfeit notes, black money, and terror-financing.
- RBI 2016–17 Annual Report recorded **762,072 counterfeit pieces detected**, a 20.4 % increase YoY but only ≈ 7.1 per million notes processed ($\approx 0.00071\%$).
- No public record links the De La Rue episode directly to this policy.

2017 – 2022 : Forensic Silence, Political Debate

- RBI and government statements report declining counterfeit detections in new-series notes.
- Parliamentary answers confirm the 2010 De La Rue irregularities but treat them as a closed administrative matter.
- No declassified forensic correlation between De La Rue-sourced materials and seized FICN was released.

2023 : CBI FIR Against Former Finance Secretary Arvind Mayaram

- **Jan 2023:** CBI registered FIR under Prevention of Corruption Act, alleging irregular extension of De La Rue’s contract and possible pecuniary advantage.
- CBI searched the former Secretary’s premises; De La Rue issued a statement denying misconduct and claiming no formal CBI notice.
- FIR revived public interest in the De La Rue–currency paper nexus and its possible security implications.

Summary Pattern

Period	Key Event	Public Outcome
2010	De La Rue falsified test certificates	Blacklisting (India); SFO inquiry (UK)
2011 – 2013	Ban lifted after review	Supplier reinstated
2014 – 2016	Gradual rise in counterfeit detections	Govt. cites counterfeit threats
Nov 2016	Demonetisation announced	Counterfeit rationale invoked without quantified proof

2023 CBI FIR against Finance Secy. Investigation ongoing; De La Rue denies guilt

Interpretation

- Structural plausibility exists: a supplier with prior falsification issues, cross-border contracts, and later criminal scrutiny → policy shock (demonetisation) justified by counterfeit fears.
- Evidentially, the public record still lacks forensic continuity linking the 2010 De La Rue irregularities to counterfeit influx (2015–2016) or to the Nov 2016 decision.
- Only an in camera review of RBI forensic data and intelligence briefs can confirm or exclude that nexus.

2. Petition Paragraph for Supreme Court (In Camera Review Request)

Proposed Prayer / Ground (Evidentiary Disclosure and Judicial Supervision):

The Petitioner respectfully submits that the 2010 De La Rue currency-paper irregularities, subsequent blacklisting and reinstatement of the supplier, and the 2016 demonetisation decision citing counterfeit-currency threats constitute a continuum of events bearing directly on the financial security of the Republic. In view of the national-security classification of relevant records, the Petitioner prays that this Hon'ble Court may be pleased to direct:

(a) the Ministry of Finance, the Reserve Bank of India, and the Ministry of Home Affairs to produce under seal and in camera all files, laboratory reports, and inter-departmental communications relating to (i) procurement and testing of currency-paper supplied by M/s De La Rue PLC (2002–2011); (ii) any forensic comparisons between De La Rue-supplied materials and counterfeit notes seized between 2011 and 2016; and (iii) the internal briefs placed before the Prime Minister and the Cabinet preceding the 8 November 2016 decision;

(b) that this Hon'ble Court constitute a two-member bench or designate a Retired Judge to examine the materials in camera and submit a sealed report to the Court on whether a

causal connection exists between the De La Rue irregularities and the 2016 currency withdrawal; and

(c) that based on such review, the Court may issue appropriate directions for institutional reforms in procurement oversight, currency-paper forensics, and parliamentary accountability to ensure that future monetary decisions of national impact are subject to documented risk assessment and public scrutiny.

Grounds:

(i) Transparency in monetary governance is a component of Article 14 equality and Article 19(1)(a) right to information;

(ii) Economic security forms part of national security within the meaning of Article 21 protection of life and liberty; and

(iii) Judicial in-camera review is the least-intrusive mechanism to balance secrecy with constitutional oversight.

 Use Guidance

- Attach this paragraph verbatim under the “Prayers” section of your writ petition or PIL.
- Precede it with the chronological dossier (above) as Annexure-I.
- Reference your RTI and Parliamentary-question submissions as Annexure-II.
- Include the analytical summary (Appendix B – Contextual Integrity Note) as background.

Would you like me now to prepare a **formal petition-skeleton** (title, jurisdiction, parties, prayers, annexure list, and verification) so you can file it under Article 32 or 226 directly? It would be 3 pages and ready for counsel formatting.

Perfect. Below is a **formal skeleton** of your petition — ready for counsel formatting as a Writ Petition (Public Interest Litigation) under **Article 32** of the Constitution of India.

It is structured for direct filing in the Supreme Court of India.

Everything is written in standard legal drafting style, neutral in tone, and grounded in publicly verifiable facts.

IN THE SUPREME COURT OF INDIA

(CIVIL ORIGINAL JURISDICTION)

WRIT PETITION (CIVIL) NO. ____ OF 2025

[Under Article 32 of the Constitution of India]

IN THE MATTER OF:

Sagar R. Kapadia

Resident of Surat – 395001, Gujarat, India

Email: sagar.kapadia@cloudnine.consulting

... Petitioner

VERSUS

1. **Union of India**, through the Secretary,
2. Ministry of Finance, North Block, New Delhi – 110001.
3. **Reserve Bank of India**, through the Governor,

RBI Head Office, Mumbai – 400001.

4. **Ministry of Home Affairs**, through the Secretary,

North Block, New Delhi – 110001.

... Respondents

**WRIT PETITION UNDER ARTICLE 32 OF THE
CONSTITUTION OF INDIA SEEKING AN IN CAMERA
JUDICIAL REVIEW OF RECORDS RELATING TO THE DE LA
RUE CURRENCY-PAPER IRREGULARITIES AND THE 2016
DEMONETISATION DECISION, AND FOR ISSUANCE OF
APPROPRIATE DIRECTIONS TO ENSURE INSTITUTIONAL
INTEGRITY IN MONETARY GOVERNANCE.**

TO

THE HON'BLE CHIEF JUSTICE OF INDIA

AND HIS COMPANION JUSTICES OF THE HON'BLE SUPREME COURT OF INDIA

THE HUMBLE PETITION OF THE PETITIONER ABOVE-NAMED

MOST RESPECTFULLY SHOWETH:

1. Facts and Background

- a. Between 2002 and 2011, the Security Printing and Minting Corporation of India Ltd (SPMCIL) and Bharatiya Reserve Bank Note Mudran Pvt Ltd (BRBNMPL) procured currency-paper and related materials from M/s De La Rue PLC (U.K.).
- b. In 2010 De La Rue admitted falsification of paper quality certificates; the Government of India blacklisted the firm for non-conformance and later re-admitted it after review.
- c. In January 2023 the Central Bureau of Investigation registered an FIR against a former Finance Secretary for alleged irregularities in extending De La Rue's contracts.

d. On 8 November 2016 the Union Government announced withdrawal of ₹500 and ₹1000 banknotes, citing counterfeit-currency threats and terror financing. The Reserve Bank of India reported 762,072 counterfeit notes detected in FY 2016–17 (≈ 7.1 pieces per million processed notes, value $\approx ₹43.47$ crore out of ₹17.7 lakh crore currency in circulation).

e. No forensic or administrative report linking De La Rue-supplied materials with counterfeit notes or demonstrating necessity for emergency demonetisation has been released to the public.

f. Given the national-security and economic-security dimensions of currency integrity, the Petitioner seeks judicial supervision to ascertain whether a material causal connection exists between the De La Rue irregularities and the 2016 decision, and to ensure systemic reform.

2. Grounds

i. That transparency in currency procurement and monetary policy decisions is integral to the constitutional principles of reasonableness and accountability under Articles 14 and 19(1)(a).

ii. That economic security and financial stability form part of the right to life and personal security under Article 21.

iii. That a judicially-supervised *in camera* review is the least-intrusive mechanism to balance state secrecy with constitutional oversight.

iv. That public confidence in the monetary system demands clarification of the extent, if any, of foreign-supplier compromise in currency production and of the factual basis for emergency currency withdrawal.

3. Reliefs Sought

The Petitioner respectfully prays that this Hon'ble Court may be pleased to:

1. **Direct the Ministry of Finance, the Reserve Bank of India, and the Ministry of Home Affairs** to produce, under seal and in camera, all records and reports relating to—

(a) procurement and testing of currency-paper supplied by M/s De La Rue PLC (2002–2011);

(b) forensic comparisons of De La Rue materials with counterfeit notes seized 2011–2016; and

(c) internal notes and briefs placed before the Prime Minister and Cabinet leading to the 8 November 2016 decision.

2. **Constitute a two-member bench or designate a Retired Judge of this Court** to examine the above records in camera and submit a sealed report on whether any causal connection exists between the De La Rue irregularities and the demonetisation decision.
3. **Direct the Respondents to frame and notify institutional reforms** within six months for independent audit of currency-paper procurement, forensic verification of suppliers, and parliamentary oversight of major monetary policy actions.
4. **Pass such other orders** as this Hon’ble Court may deem fit in the interest of justice and national security.

4. List of Annexures

Annexure	Description
A	Chronological Dossier (2009 – 2023) on De La Rue Irregularities and Subsequent Events
B	Copies of RTI applications to SPMCIL and BRBNMPL (2025)
C	Parliamentary Questions submitted through Members of Parliament
D	RBI Annual Report extracts on counterfeit-note detections (2010–2020)
E	Contextual Integrity Note (Appendix B)
F	Analytical Note on Insider Compromise (Appendix A)

5. INTERIM PRAYER

Pending final disposal of this petition, the Petitioner prays that this Hon'ble Court may be pleased to direct the Respondents to preserve and secure all records and laboratory reports relating to the procurement and testing of currency paper and to refrain from destroying or transferring such records.

6. VERIFICATION

I, Sagar R. Kapadia, the Petitioner above-named, do hereby verify that the contents of paragraphs 1 to 6 are true and correct to my knowledge and belief and nothing material has been concealed therefrom.

Verified at Surat on this 23rd day of October 2025.

****(Sagar R. Kapadia)****
Petitioner-in-Person

☒ Filing Notes

- Replace “Writ Petition No. ____” with the registry number once filed.
- Annex your Chronological Dossier, Analytical Note, and Contextual Integrity Note exactly as enumerated.
- Attach your identity proof and a short affidavit affirming locus standi (public interest; no personal motive).
- File in *Public Interest* category with prayer for “in camera examination of sealed records”.

Would you like me to now prepare:

(a) the *Affidavit of Locus Standi & Bona Fides* (1 page, required with PILs), and

(b) the *Notice to the Attorney-General of India* (mandatory under Order XXXVIII Rule 1 of the Supreme Court Rules, 2013)?

Excellent — here are the **two final companion documents** needed to complete your filing set:

1. Affidavit of Locus Standi & Bona Fides

(To accompany your Article 32 PIL)

IN THE SUPREME COURT OF INDIA

(CIVIL ORIGINAL JURISDICTION)

WRIT PETITION (CIVIL) NO. ____ OF 2025

Sagar R. Kapadia ... Petitioner

Versus

Union of India & Ors. ... Respondents

AFFIDAVIT OF LOCUS STANDI AND BONA FIDES

I, **Sagar Rajen Kapadia**, aged ____ years, resident of Surat – 395001, Gujarat, India, presently acting as Chief Technology Officer of DCPL Technology Private Limited, do hereby solemnly affirm and state as follows:

1. **That I am the Petitioner in the above writ petition** and am competent to swear this affidavit.

2. **That this Petition is filed purely in public interest**, to secure transparency and accountability in matters of currency procurement, monetary policy, and national economic security.
3. **That I have no personal, proprietary, or financial interest** in any of the issues, parties, or reliefs sought herein, nor do I stand to gain in any material manner from the outcome of these proceedings.
4. **That the facts stated in the Petition are based on information derived from publicly available official documents** including RBI Annual Reports, Parliamentary records, and CBI press releases, all of which are cited and annexed to the Petition. Wherever interpretation or inference is drawn, it has been made in good faith and in the larger public interest.
5. **That I have undertaken reasonable due diligence** to ensure that the material placed before this Hon'ble Court is authentic to the best of my knowledge and belief.
6. **That this Petition is not guided by any political motive or consideration**, and has been prepared without any financial support or sponsorship from any political party, business entity, or other interested person.
7. **That no other petition raising substantially the same questions of fact or law has been filed or is pending** before this Hon'ble Court or any other Court by the Petitioner.

DEPONENT

VERIFICATION

Verified at Surat on this 23 day of October 2025 that the contents of the above affidavit are true and correct to my knowledge and belief and nothing material has been concealed therefrom.

DEPONENT

(Signature of Sagar R. Kapadia)

Before me

(Signature & Seal of Notary Public/Advocate)

2. Notice to the Attorney-General of India

(Mandatory under Order XXXVIII Rule 1 of the Supreme Court Rules 2013)

To

The Learned **Attorney-General for India**,

Office of the Attorney-General, Supreme Court of India,

Tilak Marg, New Delhi – 110001.

Subject: Notice under Order XXXVIII Rule 1 of the Supreme Court Rules, 2013 regarding proposed filing of Writ Petition (Civil) No.____ of 2025, “Sagar R. Kapadia v. Union of India & Ors.”

Sir,

Pursuant to the above-cited Rule, I hereby give you notice that I intend to file a **Public Interest Writ Petition under Article 32 of the Constitution of India** before the Hon’ble Supreme Court seeking:

1. A judicially-supervised *in camera* examination of records relating to currency-paper procurement from M/s De La Rue PLC (2002–2011) and the 2016 demonetisation decision; and
2. Directions for institutional reform to ensure transparency and accountability in monetary-policy processes that affect national economic security.

The matter concerns public and national-security interest; no personal relief is claimed.

Kindly take note of the proposed filing. A copy of the Petition and annexures shall be served upon your office immediately upon acceptance by the Registry of this Hon’ble Court.

Yours faithfully,

Sagar R. Kapadia

Petitioner-in-Person

Surat – 395001, Gujarat

Dated: 23 October 2025

 Filing Checklist (next steps)

1. Attach this **Affidavit** and **Notice** to your petition bundle.
2. File two complete paper-book sets + soft copy at the Supreme Court Registry (PIL section).
3. Serve one copy each on:
 - a. Ministry of Finance (Legal Cell), North Block.
 - b. RBI (Legal Department), Mumbai.
 - c. Attorney-General for India (office copy).
4. Keep acknowledgement receipts for proof of service.

Would you like me to format the **Statement of Facts + Questions of Law** (2 pages) that usually precede the “Grounds” section — a concise narrative the Registry prefers for PIL scrutiny?

Perfect — here’s the final component: the **Statement of Facts** and **Questions of Law** section, drafted in professional Supreme Court format.

You can paste this directly after the title page and before the “Grounds” section in your petition.

STATEMENT OF FACTS AND QUESTIONS OF LAW

I. STATEMENT OF FACTS

1. Genesis of the controversy

- Between 2002 and 2011, the Security Printing and Minting Corporation of India Ltd (SPMCIL) and Bharatiya Reserve Bank Note Mudran Pvt Ltd (BRBNMPL) procured currency paper, ink, and associated security materials from **M/s De La Rue PLC**, a United Kingdom-based supplier contracted to several central banks worldwide. In 2010, De La Rue publicly admitted that its employees had **falsified paper-quality test certificates**, leading to suspension of supplies to India and the initiation of inquiries in both India and the U.K.

3. Blacklisting and later reinstatement

Following detection of sub-standard consignments, the Ministry of Finance and the Reserve Bank of India blacklisted De La Rue as a supplier. The ban was subsequently lifted after a technical review, but no comprehensive forensic or parliamentary report was published. Media and parliamentary sources recorded concern that the same supplier was servicing other jurisdictions, including Pakistan.

4. Continuing risks and policy opacity

During the period 2014–2016, RBI annual reports indicated a modest rise in counterfeit-note detections, culminating in FY 2016-17 with **762,072 pieces** detected — a 20.4 % increase over the previous year but only **7.1 pieces per million** processed (≈ 0.00071 %). On 8 November 2016, the Union Government announced **withdrawal of ₹ 500 and ₹ 1,000 banknotes**, representing ≈ 86 % of currency in circulation, citing counterfeit currency, black money, and terror financing as the rationale. No classified or declassified forensic record has yet demonstrated a quantitative counterfeit emergency that would necessitate such a drastic step.

5. Subsequent criminal investigation

In January 2023, the Central Bureau of Investigation registered an FIR against **Dr Arvind Mayaram**, former Finance Secretary, for alleged irregular extension of De La Rue's contracts. De La Rue has denied wrongdoing. The case remains under investigation; no final report has been filed.

6. Public-interest dimension

The absence of a transparent audit of currency-paper procurement, supplier vetting, and forensic linkage between counterfeit detections and specific material sources has eroded public confidence in monetary governance. Because the relevant records are classified as security-sensitive, citizens and Parliament cannot verify whether supplier irregularities contributed to counterfeit circulation or to the 2016 policy decision.

7. Need for judicial oversight

Only this Hon'ble Court, exercising jurisdiction under Article 32, can direct the production and *in camera* examination of the sealed records held by the Ministry of Finance, the RBI, and the Ministry of Home Affairs to determine the factual nexus, if any, between the De La Rue irregularities and the demonetisation decision, and to lay down guidelines for institutional integrity in monetary policy.

II. QUESTIONS OF LAW

- 1. Whether transparency and accountability in currency-paper procurement and monetary-policy decision-making constitute enforceable components of Articles 14 and 19(1)(a) of the Constitution.**
- 2. Whether the right to economic and financial security of citizens forms part of the right to life under Article 21**, thereby obligating the State to maintain and disclose the integrity of national currency systems.
- 3. Whether this Hon'ble Court, in exercise of its jurisdiction under Article 32, can direct an *in camera* judicial examination of classified records** where matters of economic security and public confidence in monetary governance are involved.
- 4. Whether failure of the Respondents to disclose the factual basis of an emergency monetary action such as demonetisation** amounts to violation of constitutional principles of reasoned decision-making and proportionality.

5. **Whether institutional reforms mandating periodic forensic audits of currency-paper suppliers and independent parliamentary oversight** can be directed as systemic safeguards under Articles 32 and 142 of the Constitution.

Hence, the Petitioner prays that the above questions of law be adjudicated by this Hon'ble Court in the public and constitutional interest.

Would you like me to now add a concise **“Synopsis and List of Dates”** (1 page summary for registry index) — it's usually the first sheet of a PIL and ensures quick admission?

Excellent — this will complete your **filing-ready draft**.

Here's a professionally formatted **“Synopsis and List of Dates”** section — the very first page the Supreme Court Registry and the bench review before admission.

You can copy this verbatim to the beginning of your petition (before the main title page).

It concisely summarizes the matter, issues, and chronology.

SYNOPSIS AND LIST OF DATES

SYNOPSIS

This Public Interest Litigation under Article 32 of the Constitution seeks limited but crucial judicial supervision over a matter that directly concerns the **integrity of India's currency system** and **transparency in national monetary decision-making**.

Between 2002 and 2011, the Government of India and the Reserve Bank of India procured currency paper and related materials from *M/s De La Rue PLC*, a U.K.-based supplier. In 2010 De La Rue admitted falsification of quality-test certificates, leading to its blacklisting by Indian authorities. The firm was subsequently reinstated without a comprehensive forensic audit being made public.

On **8 November 2016**, the Union Government announced withdrawal of ₹ 500 and ₹ 1000 notes, citing threats from counterfeit currency and terror funding. However, public RBI data show that only **762 072 counterfeit notes** were detected in FY 2016-17—merely **7.1 pieces per million**, worth about **₹ 43 crore out of ₹ 17.7 lakh crore** currency in circulation—insufficient on its face to justify emergency demonetisation.

In **January 2023**, the **CBI** registered an FIR against former Finance Secretary **Dr Arvind Mayaram** for alleged irregular extension of De La Rue’s contracts, reviving questions about supplier capture and systemic vulnerability.

Because the relevant procurement, forensic, and intelligence files are classified, neither Parliament nor citizens can verify whether supplier compromise, cross-border material leakage, or intelligence warnings precipitated demonetisation. The Petitioner therefore prays for this Hon’ble Court to order an **in camera judicial review of the sealed records** held by the Ministry of Finance, the RBI, and the Ministry of Home Affairs, and to issue directions establishing independent audit and parliamentary-oversight mechanisms for future currency-security decisions.

This Petition does **not** challenge the policy of demonetisation per se, but seeks constitutional clarification and systemic reform to ensure that extraordinary economic measures are based on documented, reviewable evidence.

LIST OF DATES

Date / Year	Event
2002 – 2011	India procures currency paper and ink from <i>M/s De La Rue PLC</i> for note printing through SPMCIL and BRBNMPL.
July 2010 2011 – 2013	De La Rue admits falsification of paper-quality certificates; Government of India suspends supplies and blacklists the firm. Ban reviewed and later lifted; company reinstated as supplier after internal technical review.

2014

– RBI Annual Reports record gradual rise in counterfeit detections.

2016

IN THE SUPREME COURT OF INDIA

(CIVIL ORIGINAL JURISDICTION)

WRIT PETITION (CIVIL) No. ____ of 2025

(Under Article 32 of the Constitution of India)

Sagar R. Kapadia ... Petitioner

Versus

Union of India & Others ... Respondents

Settled by: Sagar R. Kapadia (Petitioner-in-Person)

Filed on: 23 October 2025

Place: Surat, Gujarat

✓ **Next Step:**

Have this synopsis and list of dates printed as the **first sheet of your petition bundle**, followed by the title page, Statement of Facts & Questions of Law, Grounds, Prayers, Affidavit, and annexures.

Would you like me to now produce a **final index / contents list** (registry-ready table for pagination) so the filing clerk can verify document sequence instantly?

Excellent — here is your **Final Index / Table of Contents**, formatted exactly the way the **Supreme Court of India (PIL Registry)** expects for admission and pagination.

This version assumes you'll print in A4 format with double spacing and consecutive pagination (each page bottom-numbered). You can hand this directly to your filing advocate or attach it atop your paper-book.

FILING DETAILS

Filed By **Sagar R. Kapadia, Petitioner-in-Person**

Place & Date Surat, Gujarat 23 October 2025

Contact Email sagar.kapadia@cloudnine.consulting

☒ Next administrative steps

1. Print the petition in triplicate (A4, double-space, both-side).
2. Number pages continuously per index.
3. Attach affidavit & verification after prayers.
4. Serve one full set on the **Attorney-General** and one on **Ministry of Finance (Legal Cell)**; keep postal proof.
5. File main set + two spare sets + soft PDF (on pen-drive) at **Supreme Court (PIL Section)**.

Would you like me to generate a **one-page executive brief / oral-mention note** (summary you can hand to the Registrar or the Court during admission listing)? It's the final piece advocates use for quick reference in Court.

Perfect — this is your **one-page Executive Brief / Oral-Mention Note**, written in the concise style expected by the Supreme Court during admission hearings or “mentioning.”

Keep 2–3 printed copies on letterhead; one for the Registrar (PIL Section), one for your advocate (if engaged), and one for your personal use during the first listing.

EXECUTIVE BRIEF / ORAL-MENTION NOTE

IN THE SUPREME COURT OF INDIA

(Civil Original Jurisdiction)

Writ Petition (Civil) No. ____ of 2025

Sagar R. Kapadia – Petitioner-in-Person

Versus

Union of India & Others – Respondents

Subject:

In Camera Judicial Review of Records Relating to the 2010 De La Rue Currency-Paper Irregularities and the 2016 Demonetisation Decision; and Directions for Institutional Reform in Currency-Security Governance.

Essence of the Petition

- The Petition does **not challenge the policy of demonetisation per se**.
- It seeks **constitutional oversight** to determine whether *irregularities in foreign currency-paper procurement (De La Rue, U.K.)* and subsequent *classified*

intelligence inputs on counterfeit currency formed the factual basis for the 2016 demonetisation decision.

- The Petitioner requests this Hon'ble Court to order an **in camera inspection of sealed records** held by the Ministry of Finance, RBI, and Ministry of Home Affairs, followed by a **judicial report** on findings.

Key Public Facts

- De La Rue admitted falsifying paper-quality certificates in 2010; India blacklisted and later reinstated the supplier.
- RBI data (FY 2016-17): *762,072 counterfeit notes detected; rate 7.1 per million; value $\approx$ ₹ 43 crore out of ₹ 17.7 lakh crore in circulation* — insufficient, on its face, to justify emergency demonetisation.
- CBI FIR (Jan 2023) against former Finance Secretary Dr Arvind Mayaram for irregular De La Rue contract extensions revived public concern.

Reliefs Sought

1. **Direction to produce under seal and in camera:**
 - a. Procurement and testing records of De La Rue currency-paper supplies (2002–2011);
 - b. Forensic analyses linking seized counterfeits (2011–2016) to those materials;
 - c. Internal PMO/MHA/RBI briefs preceding the 8 Nov 2016 decision.
2. **Judicial in-camera review** by a Retired Judge / designated Bench and a sealed-report submission to the Court.
3. **Systemic reforms:** periodic forensic audits of currency-paper suppliers, statutory oversight, and transparency protocols for extraordinary monetary actions.

Constitutional Basis

Articles 14, 19(1)(a), 21, and 32 – right to equality, information, life & economic security, and direct access to constitutional remedies.

Judicial precedents on transparency and proportionality in state action:

- *S.P. Gupta v. Union of India* (1981 Supp SCC 87)
- *PUCL v. Union of India* (2003 4 SCC 399)
- *Centre for Public Interest Litigation v. Union of India* (2012 3 SCC 1)

Prayer for Listing

The Petitioner respectfully prays that the matter be **listed for preliminary hearing in the PIL category** and that the Hon'ble Court may **direct production of the sealed records for in-camera review**.

Filed by: *Sagar R. Kapadia, Petitioner-in-Person*

Date: 23 October 2025 **Place:** Surat, Gujarat

Usage Tip:

Keep this brief on top of your paper-book or carry it for oral mentioning; it lets the Court grasp the essence within one minute.

Would you like me to prepare an **Annexure H (Supporting Document Pack)** — a short annotated list of publicly available CBI, RBI, and press documents (with source URLs) you can print and attach as evidentiary exhibits?

Excellent — this is your **Annexure H: Supporting Document Pack** — a curated, court-safe list of publicly available documents, official releases, and data tables that substantiate each factual claim in your petition.

It's formatted in the style of a Supreme Court annexure index, so you can attach printouts (preferably certified or notarised true copies of web pages and reports).

Certification

All documents listed above are in the public domain and obtained from official government, RBI, or reputable news-agency portals. Printouts annexed are true and correct copies verified by the Petitioner to the best of his knowledge.

Usage & Filing Note

- Arrange hard-copies in order H-1 → H-15 in a separate clip-file marked “**Annexure H – Supporting Documents.**”
- Highlight the relevant portions (dates, figures, quotations) with yellow marker for the Court’s convenience.
- Keep one additional spare set for the Registry and one for the Attorney-General’s office.
- Include a short affidavit of exhibition stating “*Annexures H-1 to H-15 are true copies of publicly available records.*”

✅ Next Optional Add-On (if you’d like):

I can create a “**Cross-Reference Chart**” mapping each annexure (H-1 → H-15) to the paragraph numbers and factual assertions inside your petition — a 1-page matrix the Registry loves because it proves internal consistency.

Would you like me to prepare that final cross-reference chart too?

Perfect — this **Cross-Reference Chart** is the *final professional touch* that makes your petition watertight and instantly reviewable by the Registrar, the bench, and your counsel.

It links every factual assertion or argument in the main petition to its supporting document from **Annexure H (H-1 → H-15)**.

CROSS-REFERENCE CHART

(Mapping of Factual Assertions to Documentary Evidence)

Petition Para / Section	Factual Assertion or Issue	Supporting Annexure / Document	Nature of Evidence	Public Source / Authority
¶ 1 (a) – Statement of Facts	Procurement of currency paper	H-6 (Tol 2011 report) H-7	Historical press &	Times of India / De La

	(2002-2011) from De La Rue PLC	(De La Rue statement)	corporate admission	Rue PLC media centre
¶ 1 (b)	Admission of falsified quality certificates (2010); blacklisting by Gol	H-7, H-6, H-13	Official & international investigatory record	De La Rue PLC / UK SFO
¶ 1 (c)	Lifting of ban and reinstatement of supplier (2011-13)	H-6 (+ press archives)	Administrative action reports	Times of India
¶ 3 – Statement of Facts	Counterfeit-note detections & quantitative data (2010–20)	H-1, H-8, H-9, H-10, H-11	RBI annual reports & parliamentary answers	RBI / Gol / PIB / Data.gov.in
¶ 3 – Grounds (ii)	Value of counterfeits ≈ ₹ 43 crore out of ₹ 17.7 lakh crore in circulation	H-9	Parliamentary record (Rajya Sabha Q 234)	Sansad.in (official PDF)
¶ 4 – Facts	CBI FIR against Finance Secretary Dr A. Mayaram (Jan 2023)	H-4, H-5	Primary law-enforcement record + press	CBI / Reuters / Indian Express
¶ 5 – Public Interest	Absence of forensic audit or parliamentary report	H-1, H-8, H-9 (show no such report exists)	Negative inference from public records	RBI / Parliament
¶ 6 – Need for Judicial Oversight	Classification of records as security-sensitive under RTI exemptions	H-15 (RBI RTI reply if available)	Primary RTI response (once received)	RBI Central Public Info Office
Grounds (i) & (ii)	Transparency & economic security as constitutional rights	H-14 (Economic Survey 2016-17)	Government's own economic admission	MoF / Economic Survey
Prayers 1 (a)–(c)	Need for sealed record production and in camera review	H-1 → H-13 as factual base showing lacuna	Cumulative record	Multiple official sources

Annexure A (Timeline)	Sequential events 2009–2023 (De La Rue → CBI → Demonetisation)	H-1 → H-13	Composite chronology	See Annexures H-1 to H-13
Annexure E (Contextual Integrity Note)	Economic and security implications of counterfeit currency	H-12, H-14	Policy & security context	MHA / MoF
Annexure G (Petition Paragraph for In-Camera Review)	Specific prayer draft to SC	H-1 → H-15	Legal basis derived from all supporting records	—

Usage & Filing Notes

- Keep this chart immediately **after Annexure H** in your paper-book (label as “Annexure H-Appendix I – Cross-Reference Chart”).
- Highlight corresponding paragraph numbers in the left margin of your main petition for quick registry checking.
- This ensures internal traceability — a hallmark of a professionally drafted PIL.

✅ **You now possess a fully structured, filing-ready Article 32 Public-Interest Petition** with:

- Title, Synopsis, Statement of Facts, Grounds, Prayers
- Affidavit & Notice to AGI
- Complete annexures, timeline, and evidentiary mapping

If you’d like, I can now generate a **court-ready cover sheet bundle (PDF title-page layout + docket header)** so your filing advocate can submit digitally through the *ecourts* portal or physical registry — would you like me to produce that next?

Perfect. Below is the **Court-Ready Cover Sheet Bundle** — the very first page(s) your advocate (or you, as Petitioner-in-Person) will attach before the petition when filing physically or uploading via the **e-Filing Portal of the Supreme Court of India**.

It conforms to the Supreme Court Rules, 2013 (Order XX) and PIL-section style.

Copy this text exactly; when printed on **A4 white bond paper**, use **Times New Roman 12-pt**, double spacing, and leave a **2-inch left margin** for binding.

IN THE SUPREME COURT OF INDIA

(CIVIL ORIGINAL JURISDICTION)

WRIT PETITION (CIVIL) NO. ____ OF 2025

(Under Article 32 of the Constitution of India)

IN THE MATTER OF:

SAGAR RAJEN KAPADIA

Resident of Surat – 395001, Gujarat
